```

Get-WinEvent security -MaxEvents 10

This gives us the 10 most recent Security Event Logs so we can see the Event ID 537G repeatedly which logs Credential Manager activity

```
C:\Windows\system32> net user admin1234 P@ssw0rd /add
The command completed successfully.

C:\Windows\system32>
```

This successfully created a new user account named admin1234 with the password P@ssw0rd.

```
PS C:\Windows\system32> Get-WinEvent security -MaxEvents 10

ProviderName: Microsoft-Windows-Security-Auditing

```

In the respective id's of **4720**: A user account was created (admin1234)

4732: A member was added to a security-enabled local group.

4724: An attempt was made to reset an account's password.

```
PS C:\Windows\system32> Get-WinEvent -FilterHashtable @{logname='security'; id=4720;} -MaxEvents 1 | Format-List

TimeCreated      : 10/8/2022 1:09:57 AM
ProviderName     : Microsoft-Windows-Security-Auditing
Id               : 4720
Message          : A user account was created.

Subject:
  Security ID:      S-1-5-21-2042868057-2662589098-3356649456-1001
  Account Name:     CYRIN User
  Account Domain:   WIN-DESKTOP
  Logon ID:         0x33514

New Account:
  Security ID:      S-1-5-21-2042868057-2662589098-3356649456-1003
  Account Name:     admin1234
  Account Domain:   WIN-DESKTOP
```

Event ID 4720 confirms that the user admin1234 was successfully created

This is the Detailed Log for User Creation

Get-WinEvent -FilterHashtable @{logname='security'; id=4720} -MaxEvents 1 | Format-List

This filters for only Event ID 4720 and displays it in a detailed format The

Event ID **4720** details:

- **Account Name:** admin123
- **Performed By:** CYRIN User
- **Account Domain:** WIN-DESKTOP

This log clearly shows who made the account and gives detailed information about the new user

PART 2

We attempted a failed login using incorrect credentials in the system

[illegible]

Logs:

- Event ID 4625: Shows a failed login attempt.
- Event ID 5379: Logs background activity for Credential Manager.

Significance: Event ID 4625 is the most important log because it confirms the failed login attempt for the user **admin123**.

In PART A and PART B we have done Creating, editing, or managing user accounts in Windows generates specific logs under the Security category such as Event ID 4720 for user creation. Failed login attempts with incorrect passwords are logged as Event ID 4625 which gives details about the login failure.
